2. Authorization for this examiner's amendment was given in a telephone interview with Brian N. Young on April 14, 2005.

Examiner's Statement of Reasons for Allowance

3. The following is an examiner's statement of reasons for allowance: Prior art Glier et al, U.S. Pat. No. 5701398 teaches multiple passes through the training examples are employed in the learning process each pass is referred to as epoch. The claimed invention recites weighted matrix and activation function corresponding to a computing operation, wherein the hardware structure maps the input signal through the network of connections in the networked nodes using the corresponding weights of the weight matrix for the connection and the function of the activation function to generate the output signal. Therefore, the prior art of Giler et al fails to teach or suggest weighted matrix and activation function corresponding to a computing operation, wherein the hardware structure maps the input signal through the network of connections in the
